presents

### A Double Bill of Multimedia Dance

#### ***Bhinna Vinyasa*** **Multiple Assemblages**

A Work-in-Progress presentation exploring visual images that find expressivity through imaginations that tentatively alludes to ancient idea of ātman and paramātman as well as the Deleuzian "post-humanist future, in which the world has been enriched by a multiplicity of non-human agencies", rendering the coordinates of time and space elastic.

#### ***AadhaaraChakra*** **A Dancelogue**

(Excerpts from the multi media production)

A multi-media dance set in an imagined land, which oscillates between the past and the present, traversing intangible spaces, taking the audience on a sensorial journey across distant times and architecture as well as vivid contemporary urban landscapes and experiences.
